Introduction

Welcome to the second edition to the AVImark® User's Manual. With this edition, you will find a completely redesigned, task-oriented approach to finding help in using the AVImark® software. It is basically a response to, "Don't tell me how it works...tell me how to use it!" At the same time, we overhauled and amplified the F1 Help within AVImark so that, between these two sources, you will have a wealth of information at your fingertips.

How to use this Manual

This manual works like a reference. Start with a task or a topic that you need help on and then look it up in the Table of Contents or Index. When you have found the topic you need help on, follow the step-by-step instructions. Sometimes you will be referred to additional information found in the F1 Help.

As you utilize this manual you will notice that each chapter contains images within the left margin, these icons represent specific keystrokes, shortcut buttons and additional references.

Using the F1 Help Index

Access the F1 Help by using the F1 key anywhere in the AVImark® program. Use the Contents tab to browse through all of the manual topics. Or use the Search tab to search the Help for a specific topic.

Video Tutorials and other sources for help

McAllister Software Systems offers a variety of ways to get help and training in using the AVImark® practice management software including video tutorials, web-based and telephone training, Authorized Training Representatives, and regional seminars. Visit our website at www.avimark.net to see what's available to you.
